EDUCATION

University of Pennsylvania | Philadelphia, PA
Master of Applied Science in Computer Science | May 2026

CUNY - Hunter College | New York, NY
Bachelor of Science in Psychology | May 2021

SKILLS

Languages: Python, Java, C, C++, JavaScript, SQL

Automation and Validation: Test automation, regression testing, validation frameworks, JSON-based configuration, data parsing

ML and Data: Regression modeling, hypothesis testing, statistical analysis, data preprocessing, anomaly detection

Systems and Tools: macOS, Linux, OS-level debugging, Git, GitHub, VS Code, CI/CD, logging and instrumentation

EXPERIENCE

Quality Engineer Intern, Core OS | Apple | Cupertino, CA | Jun 2024 - Nov 2024

- Designed and integrated an automated HDMI display state validation framework into Core OS test infrastructure, increasing system-level test coverage by 25% and eliminating manual validation workflows.
- Refactored startup parameter validation tests into a scalable, JSON-based configuration-driven framework, improving maintainability and expanding regression coverage by 25%.
- Built a data-driven validation parser across 8,200 heap threshold records to identify inconsistencies and auto-update configuration thresholds, reducing false positives by 90%.
- Developed Python automation tools to retrieve device metadata and generate traceable hardware labels; adopted by 3 teams totaling approximately 19 engineers across validation and development.
- Automated device management software deployment across approximately 30 lab hosts, increasing hardware uptime by 15% and enabling proactive monitoring for reliability testing.

Technical Expert, Genius Bar | Apple | New York, NY / Valley Fair, CA | Aug 2021 - Present

- Diagnosed complex macOS and iOS software and hardware failures using structured root cause analysis, system-level debugging, and performance diagnostics.
- Maintained a TMS score of 100% across consecutive quarters, consistently above the store average of 85%, within a Genius Bar team of approximately 50 employees.

Python Instructor, Lead Teacher | Hodor After-School Program | Flushing, NY | Nov 2017 - Mar 2021

- Taught Python fundamentals to middle school students through structured lessons using games, visuals, and hands-on coding activities.
- Improved student performance by fostering a supportive environment where homework completion rates reached nearly 100%, boosting grades and confidence in STEM subjects.

PROJECTS

Flu Tweet Tracker

- Built a modular N-tier Java application to analyze flu-related tweet volumes and map outbreak patterns by geography, processing unstructured JSON and CSV datasets.
- Implemented a coordinate-based nearest-state mapping algorithm with Singleton-based logging for end-to-end traceability across the data pipeline.

Cat Food Tracker

- Developed a responsive React web app to calculate daily feline caloric needs by weight and body condition, built with HTML, CSS, and JavaScript for scalability and future API integrations.
